MONDAY

STORY & DISCUSSION

It is He who has made us, and not we ourselves.

Your immune system is the team inside you that fights off sickness. In your own words, describe what elderberry's dark purple berries do to help that team.

God designed elderberry's dark purple berries with compounds that help the body's own immune system fight off sickness.

Memory Verse

Know that the Lord Himself is God; it is He who has made us, and not we ourselves; we are His people and the sheep of His pasture. Psalm 100:3

Say it together three times.

Please write the answers in your garden journal.

Why did families long ago cook elderberries into syrup every fall, and what were they getting ready for?

Elderberry doesn't fight the sickness itself; it wakes up your body's own defenders. Why might God have built your body to fight for you?

If God designed your body on purpose, and not by accident, what is one worry you could hand back to Him and rest in this week?

Elderberry

wakes the guards

Know that the Lord Himself is God; it is He who has made us, and not we ourselves; we are His people and the sheep of His pasture.

Psalm 100:3

OPTIONAL: Complete if you have time!

TUESDAY

DISCOVERY

Elderberry's deep purple is a clue to the good inside. What other bright-colored fruits or veggies do you think are good for you?

Draw an elderberry's flat, lacy flower cluster and, beside it, the drooping bunch of berries. Color the berries deep purple and label both.

ELDER'S TINY CREAM FLOWERS SPREAD INTO A FLAT, LACY CIRCLE THAT LOOKS LIKE A DOILY.

TODAY'S WORD

IMMUNOMODULATOR means it helps your body's defenses stay strong and steady. Elderberry is an immunomodulator.

Say it together three times.

Please write the answers in your garden journal.

Why do you think elderberry hides its medicine inside its color and keeps it locked away until the berries are cooked?

An immunomodulator is a plant that helps the body's own defenses work better. What did you notice about elderberry that shows it helps the body fight back?

Little: Each batch of syrup uses 4 cups of water. How many cups for 5 batches? 5 × 4 = ___

Older: A family made 1,248 mL of elderberry syrup and used 976 mL. How much is left? ___

Elderberry

wakes the guards

Know that the Lord Himself is God; it is He who has made us, and not we ourselves; we are His people and the sheep of His pasture.

Psalm 100:3

WEDNESDAY

KITCHEN LAB

Today I made: Elderberry Syrup

Made On: _____ Opens On: _____

Ingredients and amounts used in this remedy: _____

What I noticed today:

Color: _____

Smell: _____

Texture: _____

Taste: _____

My Hypothesis:

In 1 week, when you open your elderberry syrup, what do you think its color will be? What do you think 1 teaspoon will do for your immune system?

Why?

Think about the water. It pulls the purple out of the berries, and the honey sweetens it.

Check the Cabinet

Your elderberry syrup lives in the fridge. Find it a spot and label the shelf. Most jars you make this year will sit in a cool, dark cupboard and need a shake every day or so. You open this one next week, in Week 2.

SAFETY

Never eat raw or unripe elderberries, and never the leaves, stems or bark. Cook first. No honey syrup for a baby under one year.

Know that the Lord Himself is God; it is He who has made us, and not we ourselves; we are His people and the sheep of His pasture.

Psalm 100:3

Elderberry

wakes the guards

OPTIONAL: Complete if you have time!

THURSDAY

HISTORY & ART

In the 1600s, a doctor named Martin Blochwich wrote a whole book about the elder.

In your notebook's art box, draw a large, fancy capital E the way old books decorated the first letter of a page. Fill its edges with elder leaves, lacy white flowers, and clusters of blue-black berries, and add gold or bright color. Letter beneath it: 'A remedy from every hedge.'

Elderberry helps your body's own immune system fight off sickness.

TODAY'S HISTORY

ROB: how did Blochwich's old book say to make one from elderberries?

How does today's word fit into the history that you learned?

Please write the answers in your garden journal.

Why would a doctor write a whole book about one shrub?

John Evelyn wrote that you could 'fetch a remedy from every hedge.' What did he mean?

Find Europe on a globe. What islands lie just off its northwest coast?

Elderberry

wakes the guards

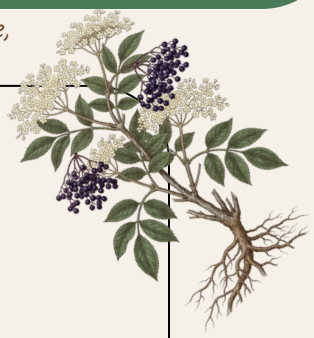

Know that the Lord Himself is God; it is He who has made us, and not we ourselves; we are His people and the sheep of His pasture.

Psalm 100:3

FRIDAY

GARDEN & REVIEW

"This week we made our medicine now to open next week. The best things ask for trust and time, and God is faithful with both." – Vovó

Scoop a handful of soil onto paper. Draw and label every living thing you find, then count them.

A handful of healthy soil is alive, full of tiny creatures quietly feeding your plants.

THIS WEEK'S HERB CHANT

wakes the guards inside of you

Say it together three times.

Please write the answers in your garden journal.

What is elderberry's gift to the body, and how does its deep purple color hint at the medicine hidden inside?

We cooked the berries into syrup instead of eating them raw. Why does elderberry need to be cooked before we use it?

John Evelyn wrote that a countryman could 'fetch a remedy from every hedge.' Why do you think one little shrub earned such big praise?

Elderberry doesn't fight sickness for you; it wakes up the defenders God already built into your body. How does that show you were fearfully and wonderfully made?

This week we met elderberry, which helps the body's own immune system fight off sickness. Long ago, a doctor wrote a whole book about the elder and its thick berry syrup, the rob. God gives us what we need before we even know we need it.

Know that the Lord Himself is God; it is He who has made us, and not we ourselves; we are His people and the sheep of His pasture.

Psalm 100:3
