

A detailed botanical illustration of a lavender plant. The plant has a central stem with several upright flower spikes of small purple blossoms. The leaves are small, green, and lanceolate. The plant is shown with its root system. The illustration is set against a light background with some green foliage visible in the corners.

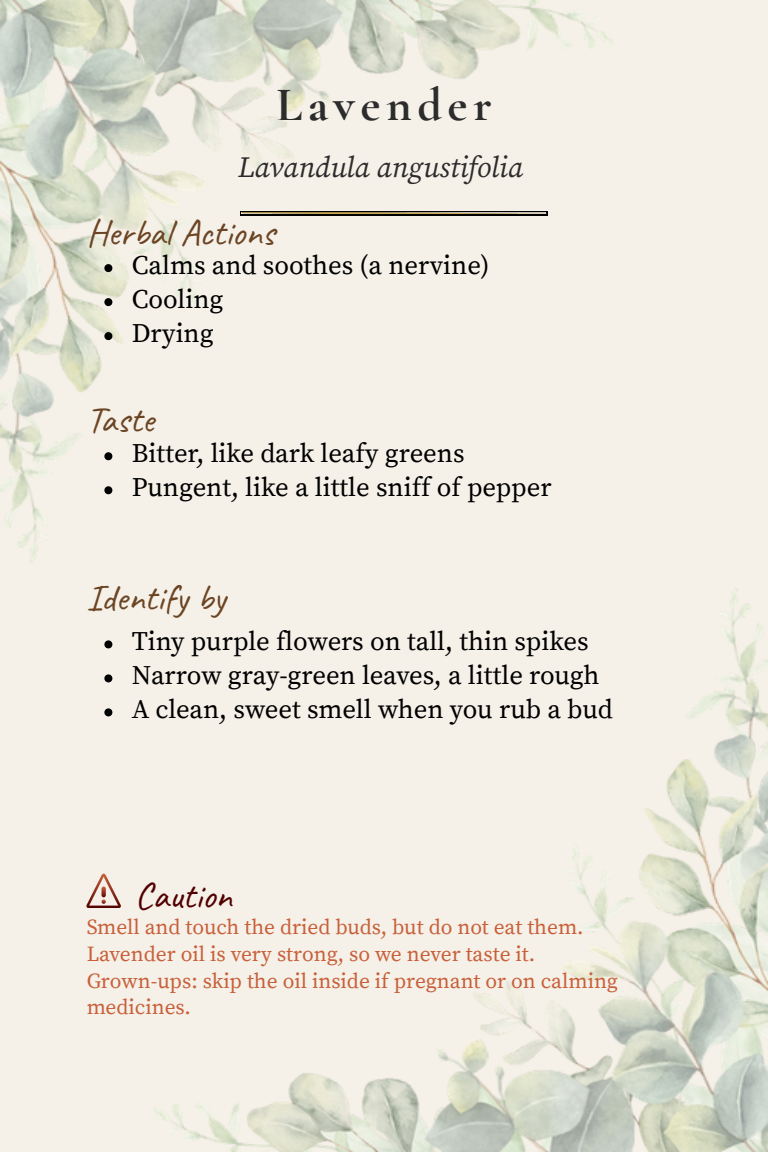

Lavender is soft and deep
Purple flowers calm the day
It will rock us off to sleep
Breathe in slow and drift away

Lavender

Lavandula angustifolia

Lavandula officinalis

Lamiaceae

A decorative background featuring soft, watercolor-style illustrations of lavender leaves and branches. The leaves are a muted sage green, and the branches are thin and brownish. They are scattered across the page, with a denser cluster in the top left corner and another in the bottom right corner.

Lavender

Lavandula angustifolia

Herbal Actions

- Calms and soothes (a nervine)
- Cooling
- Drying

Taste

- Bitter, like dark leafy greens
- Pungent, like a little sniff of pepper

Identify by

- Tiny purple flowers on tall, thin spikes
- Narrow gray-green leaves, a little rough
- A clean, sweet smell when you rub a bud

Caution

Smell and touch the dried buds, but do not eat them.

Lavender oil is very strong, so we never taste it.

Grown-ups: skip the oil inside if pregnant or on calming medicines.
