

MONDAY

STORY & DISCUSSION

'If God designed everything perfectly, why doesn't my body work?' – Manny, Story ?

DRAW A MOMENT WHEN YOUR BODY FELT OVERWHELMED. WHAT HELPED IT FEEL STEADY AGAIN?

Tell someone what happened.

HPA AXIS = HYPOTHALAMUS · PITUITARY · ADRENAL. Three parts of your body that work together when you feel stress: your brain notices (Hypothalamus), sends a signal (Pituitary), and your adrenal glands release CORTISOL — a chemical that gets you ready to respond.

THE BODY KNOWS

The body knows how to ADAPT – God designed it that way.

Say it together three times.

Please write the answers in your garden journal.

Name something your body does AUTOMATICALLY that you've never had to teach it – and explain WHY that's a clue God designed it.

STRESS IS INFORMATION, not failure. Name ONE signal your body has given you this week – and what you think it was telling you.

Tulsi

adapts to stress

'Cease striving and know that I am God; I will be exalted among the nations, I will be exalted in the earth.

Psalm 46:10

OPTIONAL — Complete if you have time!

TUESDAY

DISCOVERY

'Why would God design a body that signals stress instead of just blocking it?' — Tuesday's wonder

HOLD A TULSI LEAF. DRAW WHAT YOU SEE. (Notice the SQUARE STEM and TOOTHED EDGES.)

TULSI IS CALLED AN ADAPTOGEN — A PLANT THAT HELPS THE BODY ADAPT TO STRESS.

TODAY'S WORD

An adaptogen is a plant that helps the body adapt to stress. Tulsi is an adaptogen.

Say it together three times.

Please write the answers in your garden journal.

Tulsi smells different from chamomile. Why might God design plants with strong smells we can taste? List TWO reasons.

Tulsi is an ADAPTOGEN — a plant that helps the body adapt to stress without breaking. Think of one stress your body adapts to every day. What might tulsi do alongside that work? Explain why.

Measure ONE tulsi leaf in millimeters. Length: ___ mm ·
Width: ___ mm · Length ÷ Width = ___ (the leaf's RATIO).

Tulsi

adapts to stress

'Cease striving and know that I am God; I will be exalted among the nations, I will be exalted in the earth.

Psalm 46:10

WEDNESDAY

KITCHEN LAB

INGREDIENTS I USED:

Use a 16 oz pint jar. Pack the tulsi; measure the honey and vinegar with a ½-cup measure.

Fresh tulsi leaves

Raw honey: _____ cup

Raw apple cider vinegar (with mother): _____ cup

Anything else: _____

How much liquid total? _____ cup + _____ cup = _____ cup

METHOD

1. Pack the jar HALF FULL with fresh tulsi leaves.
2. Pour ½ cup of raw honey on top of the tulsi.
3. Pour ½ cup of raw apple cider vinegar to fill the rest of the jar.
4. Seal the jar. Label it with today's date AND with Week 10 as your check-back date. Store in a cool, dark place.

MY HYPOTHESIS

A *HYPOTHESIS* is a thoughtful guess about what will happen — based on what you already know. Scientists make a hypothesis *BEFORE* the experiment, then check it after.

Your oxymel is starting today. In 8 weeks (Week 10), you'll open it and see how it turned out. In your garden journal, write your *HYPOTHESIS*: predict the COLOR · SMELL · TASTE · TEXTURE — plus anything else you think you might observe — and explain *WHY* you predict each one.

Please write your hypothesis in your garden journal.

GARDEN ACTIVITY

While your oxymel rests, plant tulsi seeds in a small pot. Tulsi seeds need soil at least 70 °F to sprout.

Soil temperature today: _____ °F Date planted: _____

Days to first sprout (predict): _____ days Where I planted it: _____

SAFETY

Vinegar is acidic. An adult sterilizes the jar with boiling water. Your oxymel rests in a cool, dark place for 8 weeks — shake the jar daily.

★ Mark your calendar — open your oxymel on Week 10.

Tulsi

adapts to stress

'Cease striving and know that I am God; I will be exalted among the nations, I will be exalted in the earth.

Psalms 46:10

OPTIONAL — Complete if you have time!

THURSDAY

HISTORY & ART

'Tulsi is the queen of herbs.' — Ayurvedic tradition, ancient India

DRAW A TULSI LEAF. SHOW THE SQUARE STEM AND TOOTHED EDGES.

Use deep green for the leaf and purple for the veins.

A tulsi leaf has an OVAL SHAPE with TOOTHED EDGES and a SQUARE STEM — the mark of every mint.

TODAY'S HISTORY

Ayurvedic healers in ancient India have used tulsi for over 5,000 years.

Say it together three times.

Please write the answers in your garden journal.

In India, tulsi is used in two different ways: as a PLANT MEDICINE AND as part of religious worship. Christians can use the medicine — because God designed the plant's chemistry — without joining the religious practices. Explain WHY this works in your own words.

Measure your tulsi leaf drawing above. Length: ___ mm · Width: ___ mm · Length x Width = ___ mm² (the leaf's AREA).

Tulsi

adapts to stress

'Cease striving and know that I am God; I will be exalted among the nations, I will be exalted in the earth. Psalm 46:10

FRIDAY

GARDEN & REVIEW

'Onde Deus planta, a alma adapta – where God plants, the soul adapts.' – Vovó

DRAW A TULSI PLANT. LABEL THE SQUARE STEM, OVAL LEAVES, AND FLOWER SPIKE.

Color the leaves you drew.

Tulsi seeds sprout in 7 to 21 days. Plant them when the soil is warm (70°F+).

THIS WEEK WITH TULSI

Tulsi is God's adaptogenic gift – it helps our bodies adapt to stress, has been honored for 5,000 years, and grows from a tiny seed.

Say it together three times.

Please write the answers in your garden journal.

1. Name TWO mint-family markers you see in your drawing — AND explain HOW each marker would help you identify a different mint plant if you found one in the woods.
2. Manny asked: "If God designed everything perfectly, why doesn't my body work?" Write what YOU would say to Manny — using something you learned about tulsi this week.
3. Tulsi is called an ADAPTOGEN because it helps the HPA AXIS stay balanced. Name TWO things in your daily life (sleep, food, exercise, prayer, time outside) that ALSO help your HPA axis — and explain WHY each one helps.
4. Tulsi can be made into several preparations: TEA, OXYMEL, or fresh herb in food. Pick TWO and explain WHEN each one would be the right choice — AND WHY.

Manny wondered why his body doesn't work the way it was designed to. God designed bodies to adapt — and gave tulsi as a gentle helper along the way.

Tulsi

adapts to stress

'Cease striving and know that I am God; I will be exalted among the nations, I will be exalted in the earth.

Psalm 46:10
